

MAILBOX KIOSK COLLECTION

outdoor enclosures for USPS-4C

Designed for today

Built for security

Easy to install

Well engineered, securely built, and simple to install - *that's 2B-Global.*

Structurally Engineered for Safety & Durability

Our mailbox kiosks are made of heavy gauge steel, which has four times the tensile strength of aluminum panels (grade 1100) and two times the tensile strength of aluminum extrusions (grade 6063-T6), thus making it more resistant to bending, flexing, breaking, and denting.

Concealed Fasteners

2B Global's new Mailbox Kiosk Collection provides outdoor enclosures for their entire line of USPS-4C horizontal mailboxes. Featuring four distinctive styles, the mailbox kiosks compliment any architectural style.

USPS-4C

Outdoor solutions for 2B Global's line of horizontal 4C mailboxes.

Designs

Four distinctive designs to compliment any architectural style.

Finish

Available in textured stucco, enamel paint, or Autocolor 2K.

Colors

Available in four standard color combinations. The Mailbox Kiosk Collection can also be painted on-site to match any color scheme.

Consistent Quality

Pre-fabricated kiosks provide consistent quality everytime.

Easy Installation

Four masonry anchors to secure the base to the ground.
Four bolts to attach the kiosk to the base.
Four screws to install the mailbox cabinet to the kiosk.

Security

All fasteners are concealed for security.*

Corrosion Resistant

All non-stainless steel panels are electro-coated with corrosion resistant primer used in the automobile industry. Our coating plant (Eisenmann from Germany) uses Cathodic Electrode Deposition (CED) technology to ensure that the steel panels are protected against severe weather condition. We use only high quality primer from PPG USA.

Warranty

Our Mailbox Kiosks come with a five (5) years limited warranty against corrosion (perforation under normal use only) and manufacturing defects.

* except for X4GG series
