

USPS COLLECTION

Approved by USPS

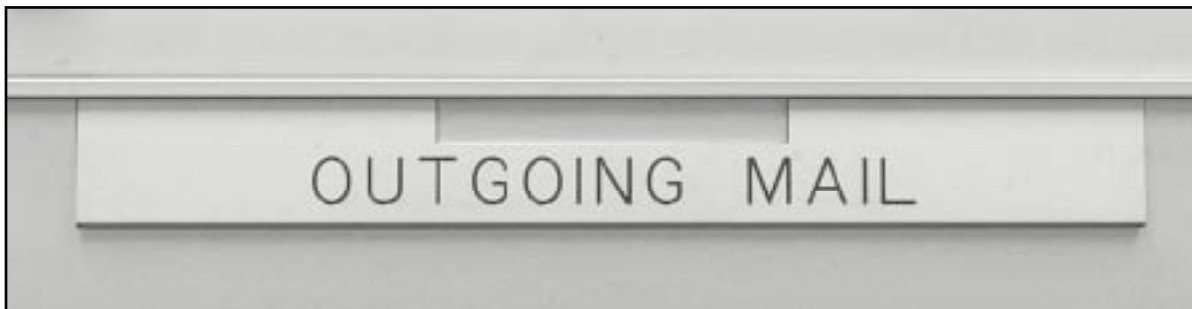

Elegantly designed

for the architects and interior designers

The USPS Collection was created with today's needs in mind. Designed to please the eye. Engineered to thwart theft. Its revolutionary design makes it the mailbox of choice.

The self-closing flap of the outgoing mail slot is mounted flush with the face of the cabinet.

No unsightly bolt heads are visible.

Precision engraving of all numbers, letters, and manufacturer identifications, unlike other manufacturers who substitute cheaper decals.

No bolt heads around the arrow lock or near the hinge which allows for a true anodized finish.

Expertly crafted

for building owners and postal carriers

Solid aluminum blocks reinforce each corner of the outer frame to keep the master loading door from sagging, thus eliminating the most common problem preventing the closure of the master loading door.

Horizontally extruded 3/4 inch ribs at the top and bottom of each tenant door for unparalleled bending strength and theft resistance.

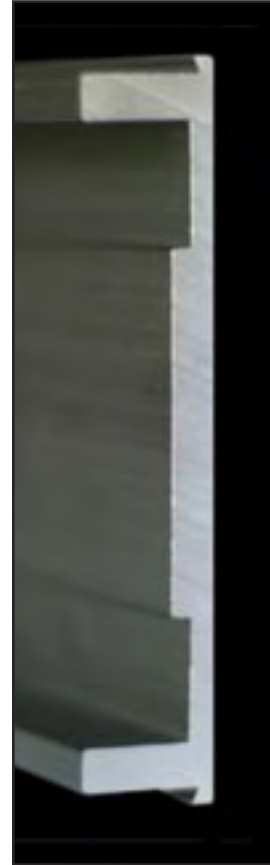

The multi-point latching eyelet provides superior security while eliminating sharp hazards for the postal carriers.

Master loading door is automatically locked when closed. An additional safety measure on the carrier access door guarantees the latch is fully-engaged when closed.

One inch thick solid aluminum angle bar is concealed inside every corner of the master loading door to keep it from sagging, tilting or shifting during transportation, installation or post-construction. This feature eliminates most of the tenant door and parcel locker door jamming issues.

USPS Approved

Standard Features

- Meets or exceeds all USPS-4C standards. USPS Approved.
- Each tenant lock comes with three keys.
- Large capacity outgoing mail collection compartment.
- Overlapping seams on master door for superior pry resistance.
- Half-inch trim on all four sides.

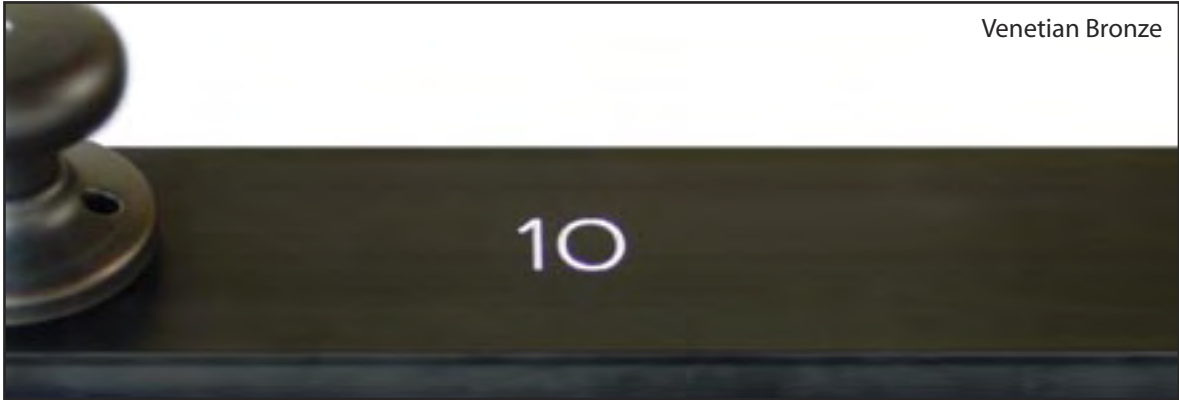

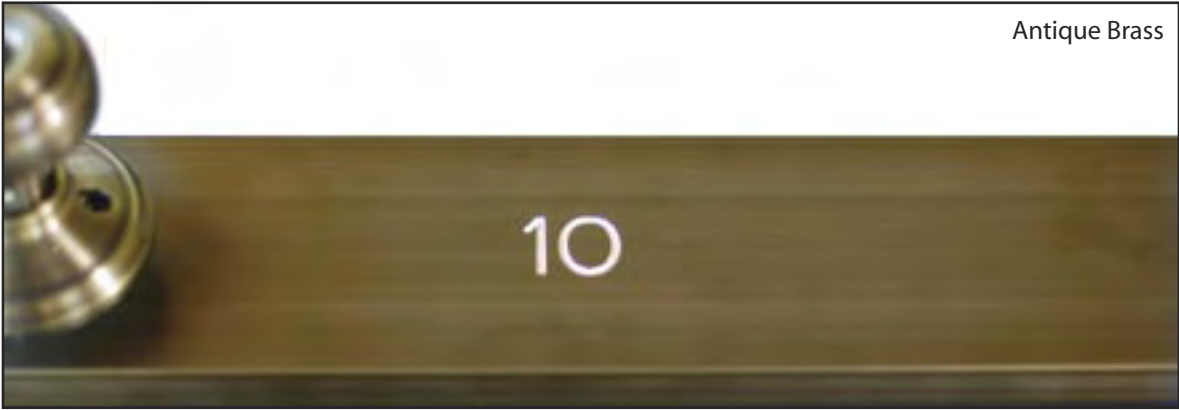

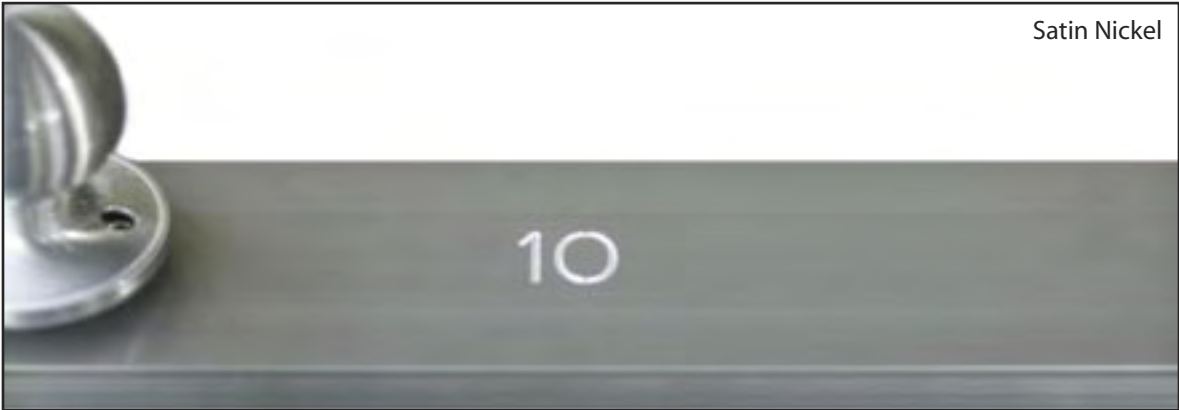

Exclusive Features

- Parcel locker door is constructed with double aluminum panels to conceal hardware and locking mechanism and it is reinforced with C channel for superior strength.
- Quick-fix connector for stacking single column mailbox cabinet onto parcel locker cabinet.

Warranty

Our USPS Collection mailboxes come with a five (5) years limited warranty against manufacturing defects.

Anodized finishes to complement standard hardware finishes.

The USPS Collection is available in a variety of anodized finishes, powder-coat colors, and two-tone combinations of natural anodized frame with powder-coated tenant doors. True anodizing offers a much richer metallic look with brushed (hairline) or matte finish.
