## 2 WIRING

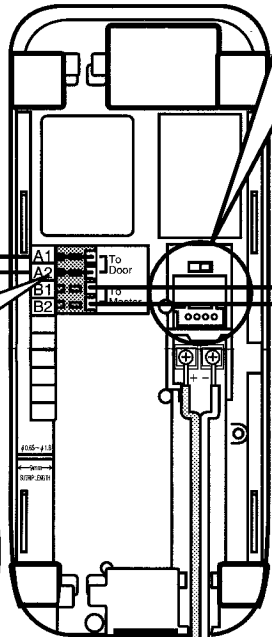

Be sure to set KC-32EU (date, time, mode). See Pages 4-5 of Operation Manual.

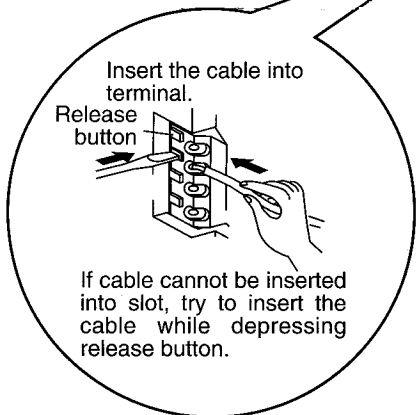

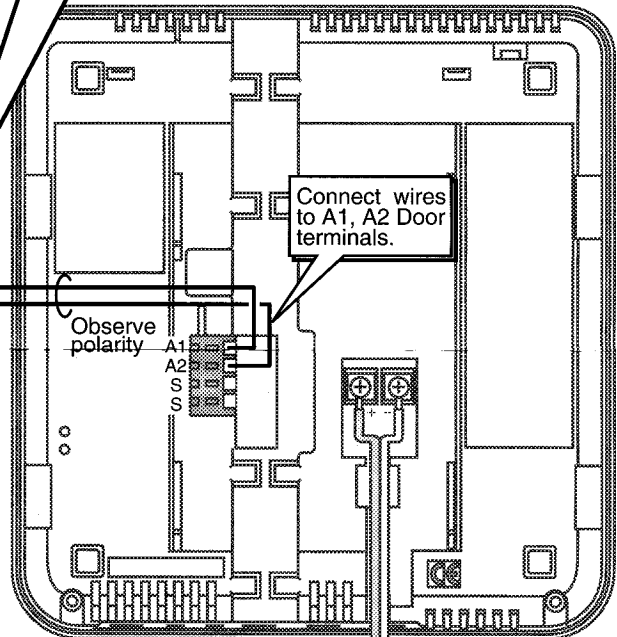

Video door station (KC-DAR)

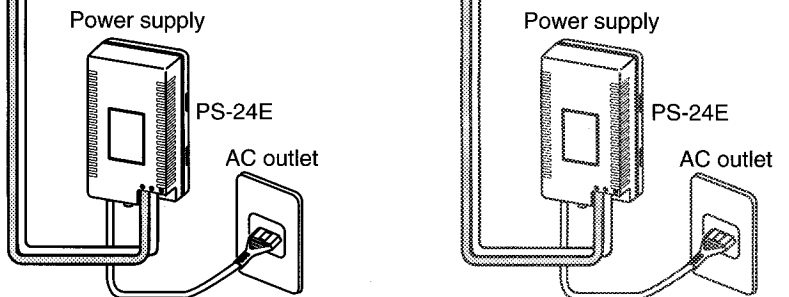

Picture memory unit KC-32EU

Master station (KC-1MRD)

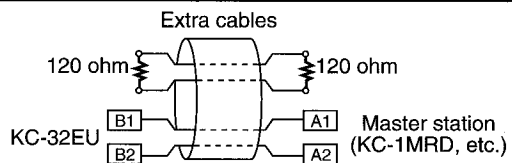

**⚠ Do not use any unused terminals for other purposes.**

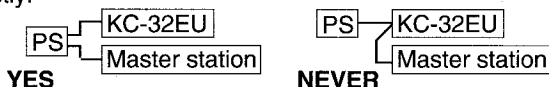

### Wiring Precautions

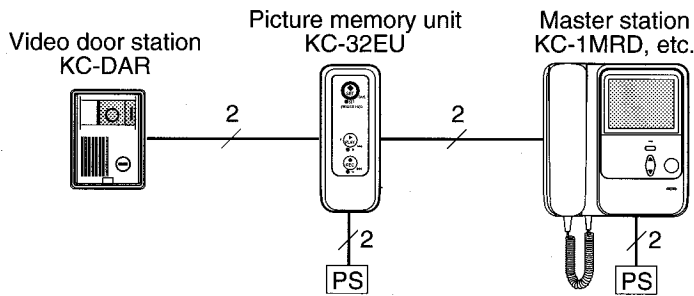

- Use a parallel conductor cable. Coaxial cable should not be used. For color video, viny jacketed, PE (polyethylene) insulation cable is recommended.
- Extra pair(s) in the installed cable can affect image quality, and must be terminated with a 120 ohm resistor at each end.

**⚠ KC-32EU and master station must be powered by a power supply directly.**

### 3 COMBINATION EXAMPLES

After installation & wiring, proceed with operational check according to the furnished Operation Manual.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Increase the separation between the equipment and receiver.
- Consult the dealer or an experienced radio/TV technician for help.
