

MODEL 1150 1/2-HP Overhead Gate Operator

Maximum gate height 14-feet

The Model 1150 is designed to operate overhead type vehicular gates that are mounted on jamb track or jamb type hardware. The low profile and quiet operation of the 1150 make it ideal for underground parking control applications.

Standard Features

- 1/2 - HP continuous duty motor
- Operates gates up to 8, 10, 12 or 14 feet high
- 40:1 gear reducer
- Direct driven limits
- Heavy-duty 3-inch rails
- #40 drive chain
- Quick release
- Shock mounts
- Plug-in loop detectors
- Built-in timer
- Gate Tracker reporting output provides operator data to access control system* (*DKS systems with card access only)
- 5-year limited warranty

Options

- The 1150 can be ordered with 4 different rail lengths to operate gates from 8 to 14 feet high
- Plug-in loop detectors
- Gate operator control stations
- **Secondary entrapment prevention devices are required with this gate operator. Refer to Section 3, Pg 9-11 for selection of devices.**
