# Color CCTV Camera Wiring Guidelines
P/N 1812-140

1.   Connect the POSITIVE terminal from the supplied power supply to terminal 5.
2.   Connect the NEGATIVE terminal from the supplied power transformer to terminal 4.
3.   Connect the COAX SHIELD to terminal 3.
4.   Connect the INNER CONDUCTOR from the coax cable to terminal 2.

COAX CABLE is not supplied. Coax Cable connects from the video monitor to terminals 2 and 3 as shown.

Use only the supplied power transformer. Camera operates on REGULATED 12 Volt DC power only. Using a AC – DC non-regulated transformer may cause camera damage.
