and call buttons

FEATURES

- Ideal for applications that do not require card access control or system expansion

- Visitors use the phone system to communicate with a resident who can grant or deny access via their own touch-tone telephone

- PC programmable via internet connection (using DKS server), modem or RS-232 interface. DoorKing Remote Account Manager and Transaction Analysis software included

- Live Transactions allows you to view activity as it happens directly on your computer display

- Large A and Z scroll buttons and one touch CALL button makes system operation quick and easy

- Prewired for postal switch

ACCESS CONTROL SOLUTIONS

™
DOORKING®

The Model 1834 is an ideal telephone entry system that is suited for large applications that have a separate access control system, or in applications that require telephone entry access only. Visitors are easily identified by voice communication and can be granted or denied access directly from a touch-tone telephone.
