

6500 HEATER WITH FAN ASSEMBLY KIT

This kit is designed for all 6500 model gate operators. For climates where temperatures routinely drop below 40°F (4°C). An automatic thermostat will control temperature inside operator housing.

Kit Includes: Heater Assembly with black and white wires, mounting plate and mounting bracket, 3 bolts, lockwashers and nuts, 2 heater nuts to mount heater assembly.

Installation

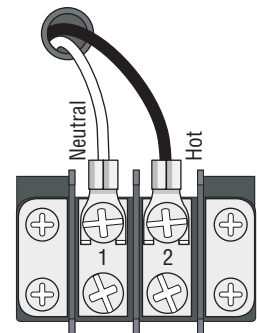

Make sure that power to the operator is **OFF** before installing kit.

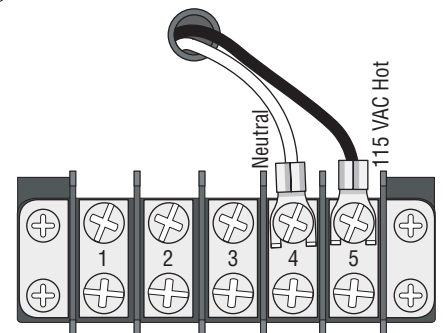

Note: Older model 6500s may need to have chassis hole drilled for this bolt.

Power Connection

Connect the heater power wires according to operator model type.

115 VAC Models

208/230/460 VAC Models

Heater Switch

ON - Normal setting. Automatically turns the heater and fan **ON** when the temperature drops below 40°F (4°C) inside the operator, and turns the heater and fan **OFF** when the temperature rises above 55°F (13°C) inside the operator.

OFF - Turns the heater off.
