Dome Stations

Audible and visual signals, internal buzzer

7633 Series

FEATURES

> Available with 2 or 4 lamps
> Internal buzzer
> Stainless steel faceplate
> White dome

The Edwards 7633 Series Dome Stations are used to visually and audibly indicate the placement of calls from a connected pull station. Stations are available with 2 or 4 lamps; the domes are designed with barriers between the lamps to prevent visual interference of signals.

The 7633 mounts in a standard double gang box with a plaster cover and a minimum depth of 1 3/4" (44mm). Boxes and plaster covers not supplied.

For use above entrances to areas equipped with a pull station. See 7302 Series on page 14-12.
