

ADAPTER (COVER) PLATE WITH COMMON MOUNTING HOLES

APPLICATION

The AP-111UW and AP-777UW adapter plates are designed to assist installers in field installations when upgrading older intercom stations.

These oversized steel cover plates will overlap the wall opening of many older, obsolete intercom stations. Newer intercom pushbutton stations, or handsets can then be mounted to the AP-111UW or AP-777UW using the variety of mounting holes provided.

Custom mounting holes (matching the existing wall holes) can be easily drilled at the job site. If you have precise measurements, LEE DAN® will drill extra holes for you for a nominal charge.

Save money—installation is quick, easy, attractive, and eliminates the need for plastering and painting over the old hole.

SPECIFICATIONS

AP-111UW Size: 8 7/8"H, 6 5/8"W, 3/16"D.

2 Mounting Holes: 8" on Center.

AP-777UW Size: 12 1/2"H, 5 1/2"W, 3/16"D.

2 Mounting Holes: 10 1/2" on Center.

Finish: Powder Coated Steel.
