

LOBBY PANEL WEATHER HOODS

APPLICATION

RAIN-GUARD™ provides an overhanging hood to help keep rain off the face of intercom lobby panels, thereby preserving the operating life of the protected panel.

- Rain-Guard weather hoods may be used with most **LEE DAN®** lobby panels built into frames, as well as most stainless steel panels made without frames.

- Sloping side panels provide an attractive finished installation and maintain panel visibility for building visitors.

- Rain-Guards are field installable, and can easily be added to existing installations.

- Rain-Guards are manufactured of heavy duty galvanized steel and finished in black powdercoat. The rich black finish blends well with any **LEE DAN** aluminum, alum/black (two-tone), gold anodized, gold/black (two-tone), black anodized, and stainless/black lobby panels.

- Rain-Guards can also be used with most Van-Guard®, Quantum, Centurion and Millennium® panels (our most popular styles for outdoor use), and many Style “E”™ (economy) panels. Consult specifications below for compatibility, or call our customer service department toll-free for assistance.

- There are four (4) standard sizes and models to choose from*

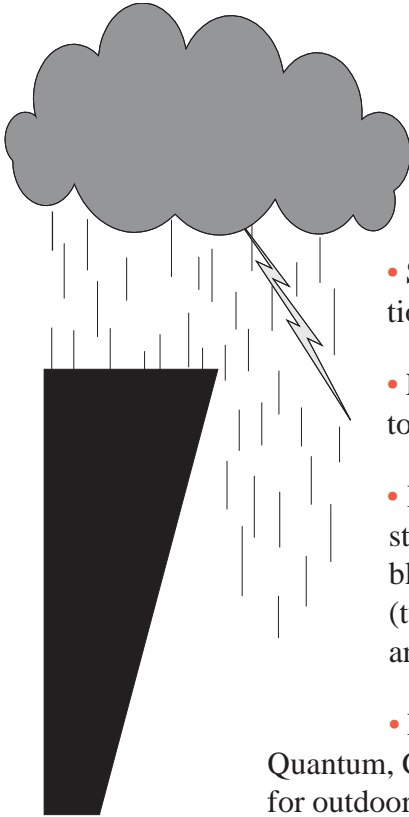

SPECIFICATIONS

Model	Height	Width	(Top) Depth	(Bottom) Depth	Fits These Frames
RG-1	12-3/4"	6-1/4"	3-7/8"	1-3/4"	OF-121 and OF-121SV
