TEK-CARE™

EMERGENCY CALL STATIONS

NEW for 2004
Ask About the
WIRELESS Tek-Care 500

APPLICATION

The SF-117B Emergency Switch is available in two models. Each model features a rugged, long-life, positive-acting switch mounted on a durable ABS plastic panel. Signaling an emergency requires just a short pull on the 6' long nylon cord in any direction.

The signal cannot be canceled except at the point of origin. The SF-117/2B provides two circuits to operate a separate visual and audible signal. The SF-117/4B provides two additional (total of 4) circuits that may be used to operate additional signaling devices as needed.

SPECIFICATIONS

Size: 4 1/2"H, 2 3/4"W, 1 1/2"D.

Controls: Activated by pulling 6' nylon cord in any direction. End of cord secured by plastic pendant.

Finish: Fog white, high impact ABS plastic.

Printing: Pad printed "EMERGENCY"

Switch: SF-117/2B: 2PDT, SF-117/4B: 4PDT

Hook-up: Wire leads.

Mounting: Single-gang electrical box (not incl.).

ARCHITECTS' & ENGINEERS' SPECIFICATIONS

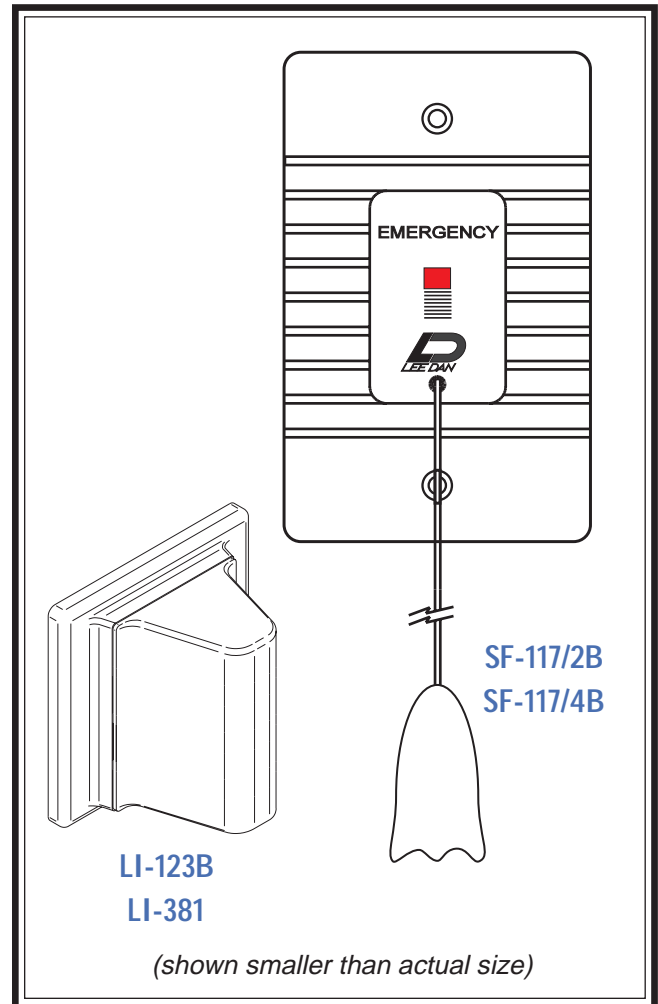

The Emergency Call Switch shall be LEE DAN® SF-117/2B, SF-117/4B or approved equal with pull-cord operated switch, mounted on a durable ABS plastic panel and marked "EMERGENCY". Call may be placed by pulling a 6' nylon cord in any direction. Canceling the call shall be possible only at the point of origin.
